Art Unit: 2664

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al (5,943,408).

Regarding claim 1, Chen et al disclose a direct signaling system which comprising a Generic Call-control State Machine (GCSM) that performs call-control functions that are common to all of the protocols (col. 3, line 48 through 37, col. 4; col. 6, line 27 through 12, col. 7, lines 12-23, col. 9); and a plurality of external signaling systems that interface between the GCSM and the selected network components and perform call-control functions that are specific to each protocol (col. 3, line 48 through 37, col. 4; col. 6, line 27 through 12, col. 7).

3. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 7-9 are allowed.

5. Applicant's arguments filed 5/11/04 have been fully considered but they are not persuasive. Applicant argued that the Chen fails to teach a GCSM performing call control functions which are common to various protocols. However, Chen discloses in lines 12-23, col. 9 implies that the call sever state machine translate or modify the protocol. Therefore, the applicant's argument is not persuasive.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
